PROFESSIONAL SUMMARY

Dedicated Junior React.js Developer with a proven track record of crafting captivating user interfaces for web applications. Proficient in the MERN stack, with expertise in React.js and Redux to ensure seamless user experiences. A collaborative team player committed to staying abreast of industry trends to drive innovation.

- Proficient in MERN stack development, adept at leveraging MongoDB, Express.js, React.js, and Node.js for robust web applications.
- Skilled in front-end development using React.js, adept at creating interactive interfaces with reusable components for dynamic user engagement.
- Strong command over JavaScript (ES6+), HTML5, and CSS3, ensuring cross-browser compatibility and responsive design principles.
- Familiarity with Redux for efficient state management and data flow in large-scale React.js applications.
- Experienced in Git for streamlined collaborative development and code management.
- Committed to continuous learning and self-improvement, staying updated with the latest trends and best practices in MERN stack development.

EXPERIENCE

REACT.JS DEVELOPER IN MPHASIS | SEP 2023 - MAR 2024

SKILLS

JavaScript , Core Java,SQL,React.Js, Node.Js, MongoDB, HTML, CSS,,.

EDUCATIONAL QUALIFICATIONS

B. Tech Electronics and Communications [July-2022]	St. Peter's Engineering College	7.3 CGPA
Intermediate [March-2018]	Sri Chaitanya Junior College	95.2%
SSC Examination [April-2016]	Model Mission High School	7.5 CGPA

PROJECT SUMMARY

Title: Car rental application using MERN stack.

Environment: HTML, CSS, React.Js, Express.Js, MongoDB.

Role: React.js developer.

Responsibilities:

- Develop user-friendly interfaces for customers to browse vehicles, make reservations, and process payments securely.
- Implement interactive features such as vehicle search, filtering, and booking management.
- Ensure cross-browser compatibility and responsive design for optimal user experience across devices.
- Collaborate with backend developers to integrate frontend components with backend functionalities.
- Build robust APIs for handling user authentication, vehicle management, booking requests, and payment processing.
- Design and maintain the database schema to store vehicle inventory, user information, booking records, and transaction data.
- Optimize database performance for efficient data retrieval and storage.
